

EDUCATION

| Degree                         | Score  | Year   |
|--------------------------------|--------|--------|
| B.Tech. AI & DS<br>IIT Jodhpur | 6.1    | 2nd Yr |
| 12th – Karnataka Board         | 92.67% | 2024   |
| 10th – CBSE                    | 73%    | 2022   |

TECHNICAL SKILLS

- Languages:** Python, JavaScript, C, C++
- SDE / Engineering:** Object-Oriented Programming, Data Structures & Algorithms, REST API, System Design, Version Control
- Web Dev:** React.js, Node.js, FastAPI, HTML5, CSS3, Three.js
- AI / ML:** Machine Learning, NLP, Scikit-learn, PyTorch, NumPy, Pandas, OpenCV, RAG, Prompt Engineering, mAP
- Databases:** MongoDB, SQL, Google OAuth 2.0
- Tools:** Git, GitHub, Google Colab, VS Code, Postman, Vercel, Linux

KEY COURSES

- CS:** DSA, OS, OOP, Web Services
- AI / Math:** ML, AI, Neural Networks, Pattern Recognition, Linear Algebra, Probability & Statistics

CERTIFICATIONS

- freeCodeCamp** 2024
  - Responsive Web Design & JS Algorithms

POSITIONS OF RESPONSIBILITY

- Sports Coordinator,** Hockey Club, IIT Jodhpur *July 2025 – Apr. 2026*
- Led event logistics & inter-IIT coordination for 16+ members.

PROFESSIONAL SUMMARY

Full-stack **Software Engineer** and 2nd-year B.Tech. (AI & Data Science) student at IIT Jodhpur with hands-on experience designing, building, and deploying **production-grade web applications**. Proficient in **Python, JavaScript, React.js, Node.js, FastAPI**. Seeking **SDE / Software Engineering** roles.

EXPERIENCE

- Software Research Intern – AI & Decision Making Lab** *May 2025 – Nov. 2025*  
*Under Prof. Venkat Ram Reddy* IIT Jodhpur
  - Engineered an **automated benchmarking pipeline** in Python to evaluate **5+ LLMs** across **50+ NLP test scenarios**, systematically measuring response accuracy, consistency, and relevance using structured evaluation scripts.
  - Applied **software debugging and testing** principles to stress-test model outputs via **prompt engineering**, improving evaluation methodology coverage by **~30%** and producing reports that guided LLM selection decisions.

PROJECTS

- IITJ Mess Rebate Application | Live** *Sept. 2025 – May. 2026*  
*Production full-stack utility for IIT Jodhpur students.*
  - Architected and deployed a **scalable full-stack web application** end-to-end – designed **MongoDB** database schema, implemented **Google OAuth 2.0** secure authentication, and built **React.js** UI.
  - Automated complex rebate calculation logic, reducing manual estimation effort by **80%** and eliminating calculation errors.
  - **Stack:** React.js, Node.js, MongoDB, Google OAuth 2.0, JavaScript, Vercel
- SQORA – Smart Query & Resource Assistant | GitHub | Live** *Jan. 2026 – May. 2026*  
*AI-powered full-stack web application for collaborative student knowledge management.*
  - Designed and implemented using **FastAPI** serving a **React.js** frontend, supporting concurrent multi-user queries with **sub-2 s response times**; deployed via **CI/CD pipeline** on Vercel.
  - Led frontend module development in a **5-member Agile team** following **Git-based version control** and **modular component architecture**; integrated **RAG pipeline** improving answer relevance by **40%**.
  - **Stack:** React.js, Node.js, Python, FastAPI, REST API, RAG, Vector DB, Git, Vercel
- Image Segmentation Web App | Live** *Sept. 2025 – Nov. 2025*  
*Full-stack real-time image processing tool with frontend-backend integration.*
  - Designed and integrated a **FastAPI** backend with a **JavaScript** frontend, enabling real-time image upload and processing with **<500 ms latency**.
  - Implemented a modular **Python** image-processing pipeline using **HSV colour-thresholding (OpenCV)** for accurate multi-region detection across varied inputs.
  - **Stack:** Python, OpenCV, FastAPI, REST API, HTML5, CSS3, JavaScript
- Domain-Guided Content-Based Image Retrieval | GitHub** *Jan. 2026 – Apr. 2026*  
*Cross-domain visual retrieval system – Office-Home dataset (65 classes, 4 domains).*
  - Implemented **DANN** with **Gradient Reversal Layers** in **PyTorch** for domain adaptation; achieved **73.4% mAP** and **71.2% Top-1 Accuracy** with ResNet-50 – **38.7%** above the source-only baseline.
  - **Stack:** Python, PyTorch, ResNet-50, VGG16, DenseNet, OpenCV, Scikit-learn, NumPy
